Oversize Common Carrier Delivery

All orders with any quantity of shades or blinds or any continuous valance 90" or more in width are considered oversized. Therefore, a net shipping charge per oversized unit will be assessed.

Oversized orders that require expedited shipping will be quoted and charged accordingly.

Please see General Information for additional freight and shipping charge information.

TERMS OF SALE & FREIGHT / REPAIR CHARGES

PRICE QUOTATION

All Woven Wood products are priced FOB San Diego, CA and do not include freight.

All prices subject to change without notice.

To ensure order accuracy, please use the Woven Wood order form. The blank order form can be found at the back of the price book. Make copies to create additional blank order forms.

EMAIL ORDERS

Complete the order form and submit it to: atl.orders@turnils.com.

CANCELLATION OR CHANGE ORDER

IMPORTANT! Due to the custom nature of our products, we cannot accept changes or cancellations after orders have been put into production.

LEAD TIME

Typically, orders (less than 10 units) are manufactured and shipped within 5 business days. All orders are subject to inventory availability. Orders placed after 3:30 p.m. EST are considered as next day business.

ORDER TRACKING & ORDER STATUS

Order confirmations are sent via email within 24 hours of placing order. Please make sure you have your email on file with Turnills. To track your order or check the status of your order, please contact customer service and provide them with the work order number.

STANDARD SHIPPING & HANDLING, DELIVERY & FREIGHT POLICIES

IMPORTANT NOTE ABOUT NATURAL WOVEN MATERIALS

Our custom crafted Woven Wood shades are uniquely constructed from natural bamboo, reeds, jutes, rattan, grasses and woods. Many materials, such as natural grasses, are hand tied and braided with expert care. Each shade is one of a kind. Slight cracks, imperfections and variations in color are all inherent in natural products and are not considered flaws - merely natural enhancements made by Mother Nature herself! Natural Woven Shade material may stretch slightly over time and with use depending on the material style. The average stretching amount is approximately 1/2" for every 3 feet of shade length plus or minus 1/4".

“Due to the woven construction of our shades, yarns may have shifted during shipping. This shifting may cause a slight shortening of height or uneven edges. Please read below for quick and easy remedies. Height: If after installation you find your shade is slightly shorter than the ordered height, simply grasp the bottom of the shade and gently pull to stretch the product to full height. Note: Some shade materials may stretch slightly over time and with use. Uneven Edges: Lightly top edge of shade with a flat surface (ruler, etc.) until even.”

WOVEN WOOD AUTOMATION

The automation cost factor is different from blinds/shades. If you need to access your cost factor, refer to page 4 in the General Information Guide.

Use appropriate grid for shade price, then add extra charge(s) below.

Automation consists of a motor, power source and controller. Be sure all of these elements are included when determing final price.

SHADE CONFIGURATION DIAGRAM

Shades and Individual Valances Are Built on 1 of 3 Headrail Depths:

- 1-1/2" Headrail Depth: Standard Rectangular, Waterfall Style, Top-Down/Bottom-Up & Turned Headrail
- 2-1/2" Headrail Depth: Automatio, Continuous Loop Control, 2 on 1 Headrail & Individual Valances
- 3/4" Headrail Depth: For narrow mounts

OUTSIDE MOUNT (& CEILING MOUNT) VALANCE WIDTH ADDITIONS FOR:
Standard, Top-Down/Bottom-Up & Somfy Automation Shades (see next pages for Continuous Loop Control Shades)
A small width addition is made to the valance to create a "cornice style" box for approved appearance & shade operation/
stacking.
Valance Width ADDITION = +1/2 "PER SIDE = +1" Total

RETURN NOTES:

Standard outside mount return depths are 1-3/4" for the small headrail and 2-3/4" for the large headrail.

Outside mount returns are attached to the valance using the **VRS SYSTEM on woven wood only**.

The VRS System is NOT featured on Decorative Wovens due to the sheerness and fabric weight. Returns will use the classic velcro for attachment.

The outside mount valance width addition covers the front facing edge of the return and creates a clean corner.

If optional returns are ordered on an IB Mount, they will use the classic velcro "dog ear" attachment method (not VRS).

Returns not available on turned headrail or 3/4" headrail shades.

VALANCE RETURN STABILIZER (VRS) SYSTEM

Outside mount shade valances come with the innovative Valance Return Stabilizers (VRS) System. The VRS System includes clear corner pieces and are attached to the valance and returns, keeping them stable and in perfect alignment. The valance also covers the front edge of the returns. A tiny spring mechanism in each VRS keeps the valance hanging straight down off the headrail, while also allowing you to raise the valance for installing the shade and for periodic dusting/cleaning underneath.

Not Available on Decorative Wovens. Returns with velcro are available under Decorative Wovens.

LIMITED LENGTH ADJUSTER

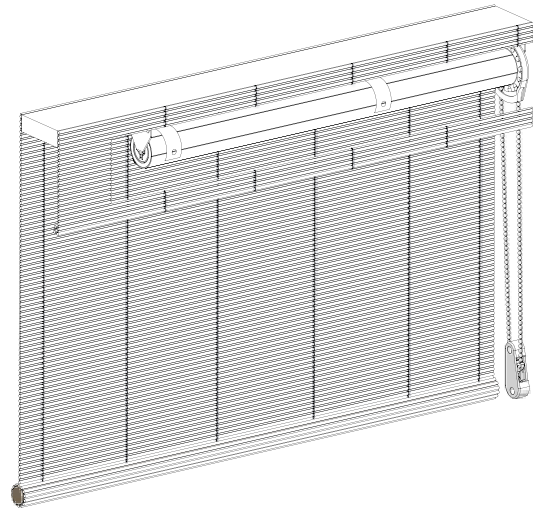

Woven Wood shade configurations that have a bottom dowel will include a Limited Length Adjuster. Shades that have a edge-binding or tape-binding on the bottom will NOT include the adjuster. The Limited Length Adjuster allows up to a 1" shade height reduction (depending upon the dowel size and woven material). It works by simply SLIDING UP the Adjuster on each side of the shade which in turn rolls the dowel up. This is an innovative solution to adjust for some woven shade stretching, which may occur to some extent over time with all woven wood materials.

Not Available on Decorative Wovens

CONTINUOUS LOOP CONTROL SHADE DIAGRAM

INSIDE MOUNT WIDTH DEDUCTIONS FOR: Continuous Loop Control Shades
Minor adjustments are made to the standard IB width deductions for Continuous Loop Control shades to improve the loop control operation. These adjustments allow the loop control and safety tensioner to be shifted toward the outside edge of the shade.

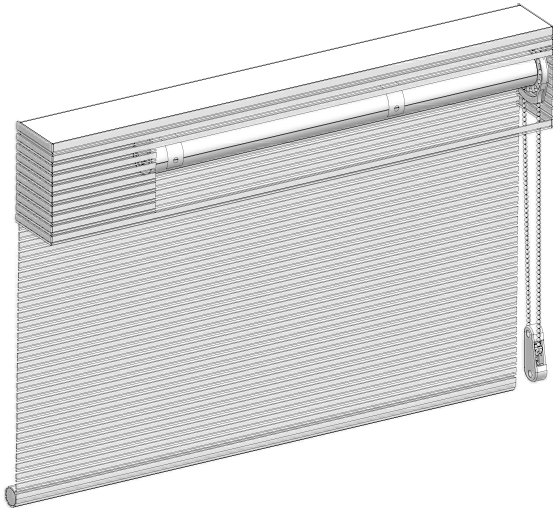

Headrail & Valance Width DEDUCTION = **-1/4" (STANDARD) IB WIDTH DEDUCTION ON BOTH SIDES = -1/2" Total**
Shade Panel Width DEDUCTION = **-1/4" (ADJUSTED) IB WIDTH DEDUCTION ON BOTH SIDES = -1/2" Total**

standard - 1/4" IB width deduction to headrail, fabric and valance ON BOTH SIDES

OUTSIDE MOUNT (& CEILING MOUNT) WIDTH ADDITIONS FOR: Continuous Loop Control Shades
Minor adjustments are made to the standard OB width additions for loop control shades to improve the loop control operation. These adjustments allow the loop control, chain and safety tensioner to be shifted toward the outside edge of the shade.

Headrail Width ADDITION = **+1/4" ON BOTH SIDES = +1/2" Total**
Valance Width ADDITION = **+3/4" ON BOTH SIDES = +1-1/2" Total**

adjusted +1/4" OB width addition to headrail ON BOTH SIDES
adjusted +3/4" OB width addition to valance ON BOTH SIDES

NOTE: The adjusted OB width additions to the headrail (+1/4" on each side) allow clearance for the loop control and safety tensioner.

Valance and returns attach with the VRS system (Woven Woods only) which then adds the (standard) +1/2" beyond the headrail width on each side.

CONTINUOUS LOOP CONTROL SYSTEM - MOUNTING AND WIDTH ADJUSTMENTS NOTES

Continuous Loop Control Systems offer manually operated clutch mechanisms for raising and lowering shades. By simply putting on one side of the loop, shades can be quickly and precisely positioned. Left or Right side control positions may be specified.

Continuous Loop Control shades are installed with special L-shaped (small roller shade cassette headrail style) mounting brackets, which snap into a flat, custom fit connector pre-attached to the headrail. This loop control bracket system allows the loop control mechanism to be shifted to the very edge of the headrail so that the loop is shifted toward the edge of the shade, rather than hanging in front of the shade. The width adjustments made on the loop control side allow the cord loop to hang straight down to the required, mounted safety tensioner and clear the edge of the woven material.

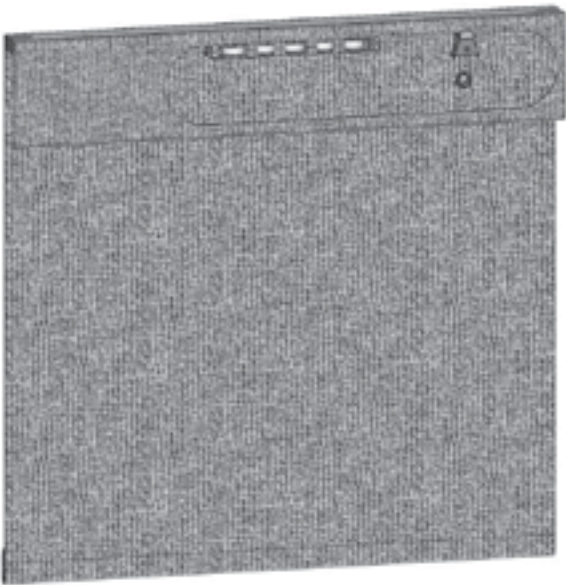

NOTE: There is a likelihood where cord will rub against the edge of the shade. Hence, edge binding is highly recommended.

CORDLESS SHADE DIAGRAM

Cordless shades can be built on small 1-1/2" and/or large 2-1/2" depth headrail depending on shade material and size.

INSIDE MOUNT WIDTH DEDUCTIONS FOR: Cordless

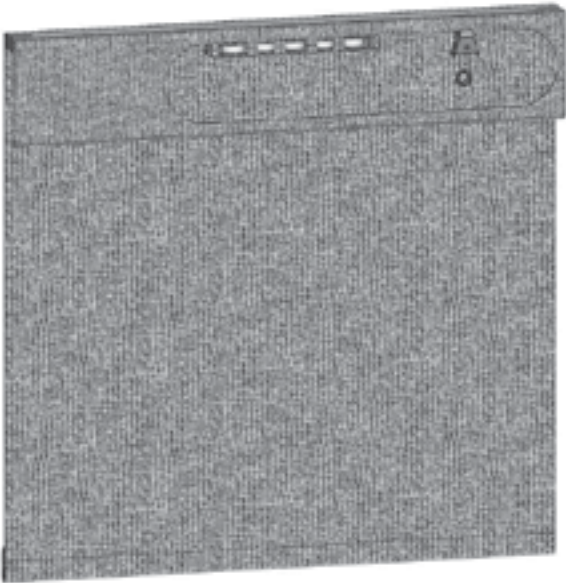

Headrail & Valance Width DEDUCTION = **-1/4" (STANDARD) IB WIDTH DEDUCTION ON BOTH SIDES = -1/2" Total**

standard -1/4" IB width deduction to headrail, fabric and valance ON BOTH SIDES

OUTSIDE MOUNT AND CEILING MOUNT WIDTH DEDUCTIONS FOR: Cordless

Headrail Width ADDITION = **+1/4" ON BOTH SIDES = +1/2" Total**
Valance Width ADDITION = **+3/4" ON BOTH SIDES = +1-1/2" Total**

adjusted +1/4" OB width addition to headrail ON BOTH SIDES
adjusted +3/4" OB width addition to headrail ON BOTH SIDES

NOTE: The adjusted OB width additions to the headrail (+1/4" on each side).

Valance and returns attach width the VRS system (Woven Woods only) which then adds the (standard) +1/2" beyond the headrail width on each side.

LIMITED LENGTH ADJUSTER

Woven Wood Cordless shade without edge-binding will have a limited length adjuster. Insert a phillips screwdriver into the adjuster. Turn left to shorten and right to lengthen.

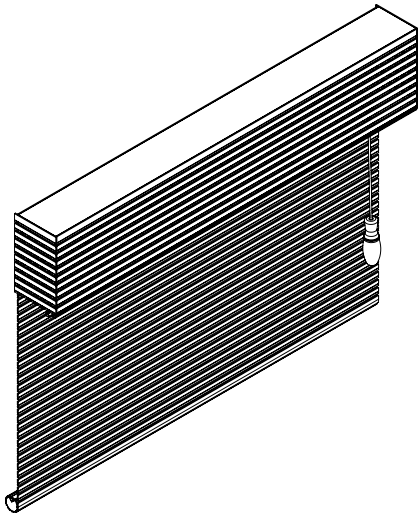

This is a solution to allow limited adjustment for some woven shade stretching, which may occur to some extent over time with all woven wood materials.

SHADE CONFIGURATION OPTIONS

FEATURES & OPTIONS NOTES:

- Continuous Loop Control shades. Automation shades and individual valances are made with the larger 1-1/2" depth headrail.
- Wider shades may also come with ceiling mount bracket(s) used to support the center headrail area. Flat (T-Style) may also be ordered by request.
- Custom shade valance heights may be specified at 12" at NO extra charge.
- Returns standard on OB shades and valance orders ONLY, unless specified. Return widths are 1*3/4" (for small HR) and 2-3/4" (for large HR).
- Either of 2 size wood dowel bottomrails are wrapped with the selected woven material. Dowel size used depends on material style - see dowel size detail under color chart.
- Chain may rub against Continuous Loop Control shade, edge binding is highly recommended.
- TDBU shades require an EXTRA LONG lift cord and come with a CORD CLEAT to wrap excess cord. These shades are built on 1-1/2" depth headrail.

2-on-1 TDBU shades over 96" are built on 1-1/2" depth headrail.
- Waterfall-Style shades may be motorized. They are no available in Top-Down/Bottom-Up.
- Widths over 96" will always receive a spliced valance split at the top of the shade gap. There is a 1/2" gap between individual shades. Cordless and motorized shades are available with

2 on 1 headrail. Cordlock & Continuous Loop Control are only available with 2-on-1 (control will reside at outer ends). All 2 on 1 shades are built on 2-1/2" depth headrail.
- Cut-out maximum size is 3" x 8" and only available on the Left or Right **bottom** corner of the shade. Cut-Outs are NOT available when edge-binding, twill edge-binding or faux silk binding is ordered or on cordless shades.

- All standard rectangular shades are built on the SMALL 1-1/2" depth headrail unless the LARGE 2-1/2" depth headrail is specified on the order.
- Continuous Loop Control and Automation shades are only built on the LARGE 2-1/2" depth head rail due to the tube size.
- Cordlock 2-on-1 shade can also be built on the LARGE 2-1/2" depth headrail.

* 2-on-1 Top-Down/Bottom-Up shades that are wider than 96" in width are built on a 2-1/2" headrail.

** Cordless shades can be built on SMALL 1-1/2" and/or LARGE 2-1/2" depth headrail depending on shade material and size.

Twill-Edge Binding and Faux Silk Binding

- Shades ordered with Twill Edge Binding or Faux Silk Binding follow the same size specifications as listed on the preceding pages.
- On Cordless, binding can only go onto shade sides and/or valance sides (ES/ESVB/TSVB) if ordered.

2-on-1 Headrail	
Gap Between Panels	- 1/2"

Note: Continuous Loop Control Shades have adjusted inside mount width deductions and outside mount width additions to allow operational clearance for the loop control and safety tensioner.

FINISHED DIMENSION & MOUNTING NOTES

Note: Ceiling mount shades are OB/OS by default and have the same finished dimensions. IB/Is shades may also be "TOP" mounted using the standard L--Style brackets or using the optional flat brackets.

* OB/OS valances and returns are attached using a valance return stabilizer. The OB/OS valance width additions indicated above create a "cornice style" box for improved appearance and operation.

** The flush mount depth requirements indicated above include space for the woven materiel attached to the front (valance) and back (shade) sides of the headrail. These are AVERAGE depths as the different woven wood and materials have varying degrees of thickness. Verify your individual shade's depth before mounting, then position brackets accordingly for an EXACT flush mount.

MOUNTING REQUIREMENTS

Use a metal tape measure for all measurements.
